# Blockchain

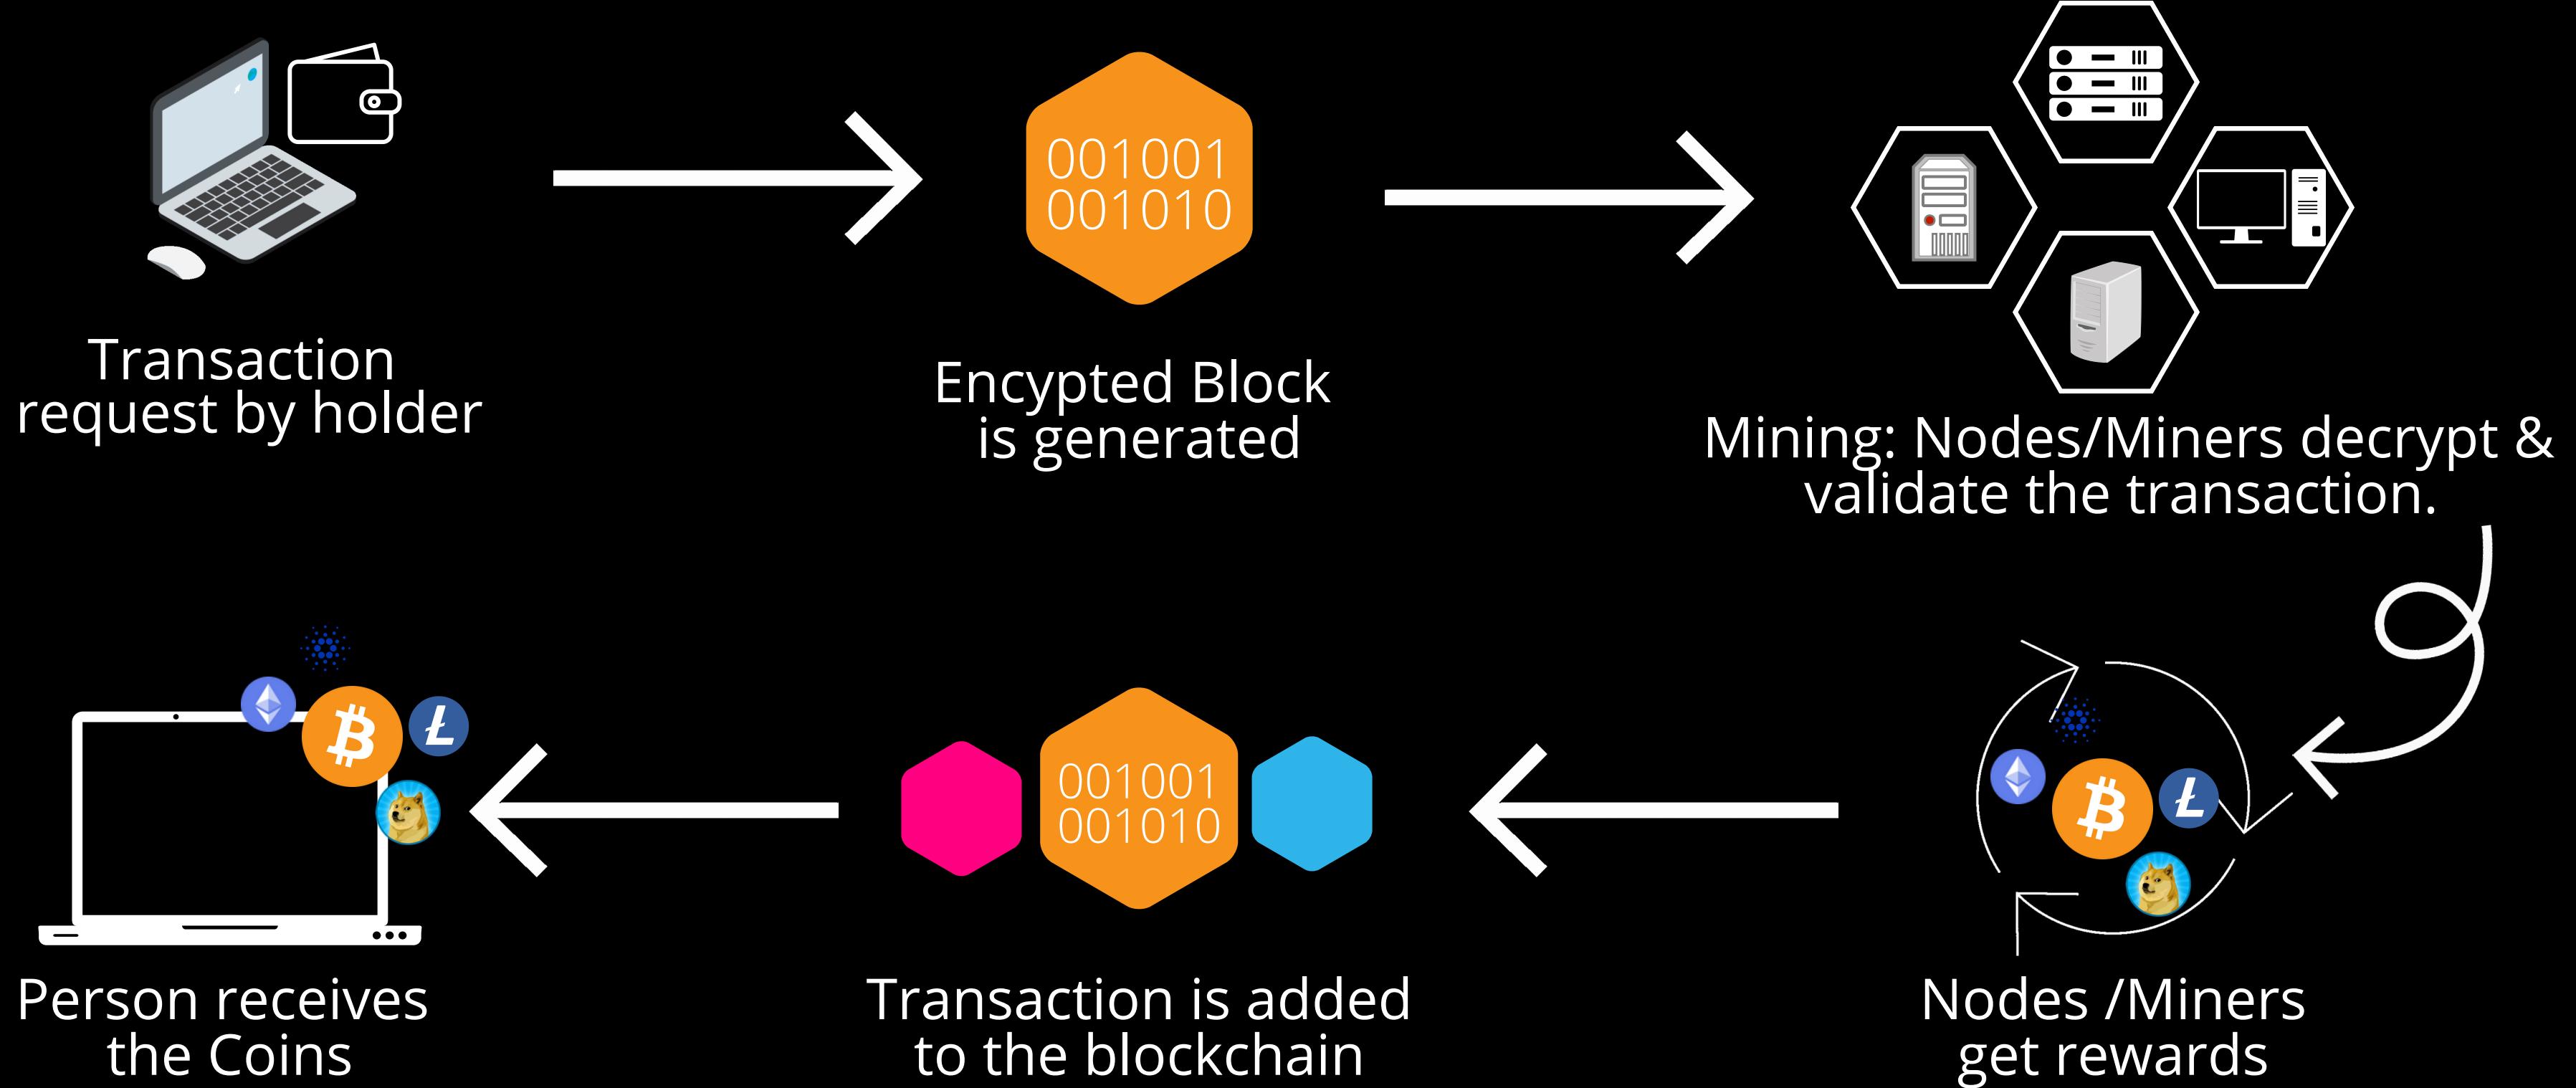

# What is Blockchain?

A blockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the blockchain. Each block in the chain contains a number of transactions, and every time a new transaction occurs on the blockchain, a record of that transaction is added to every participant's ledger. The decentralised database managed by multiple participants is known as Distributed Ledger Technology.

***Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system.***

# How Blockchain Works?

# Why Blockchain is necessity?

No central  
Authourity

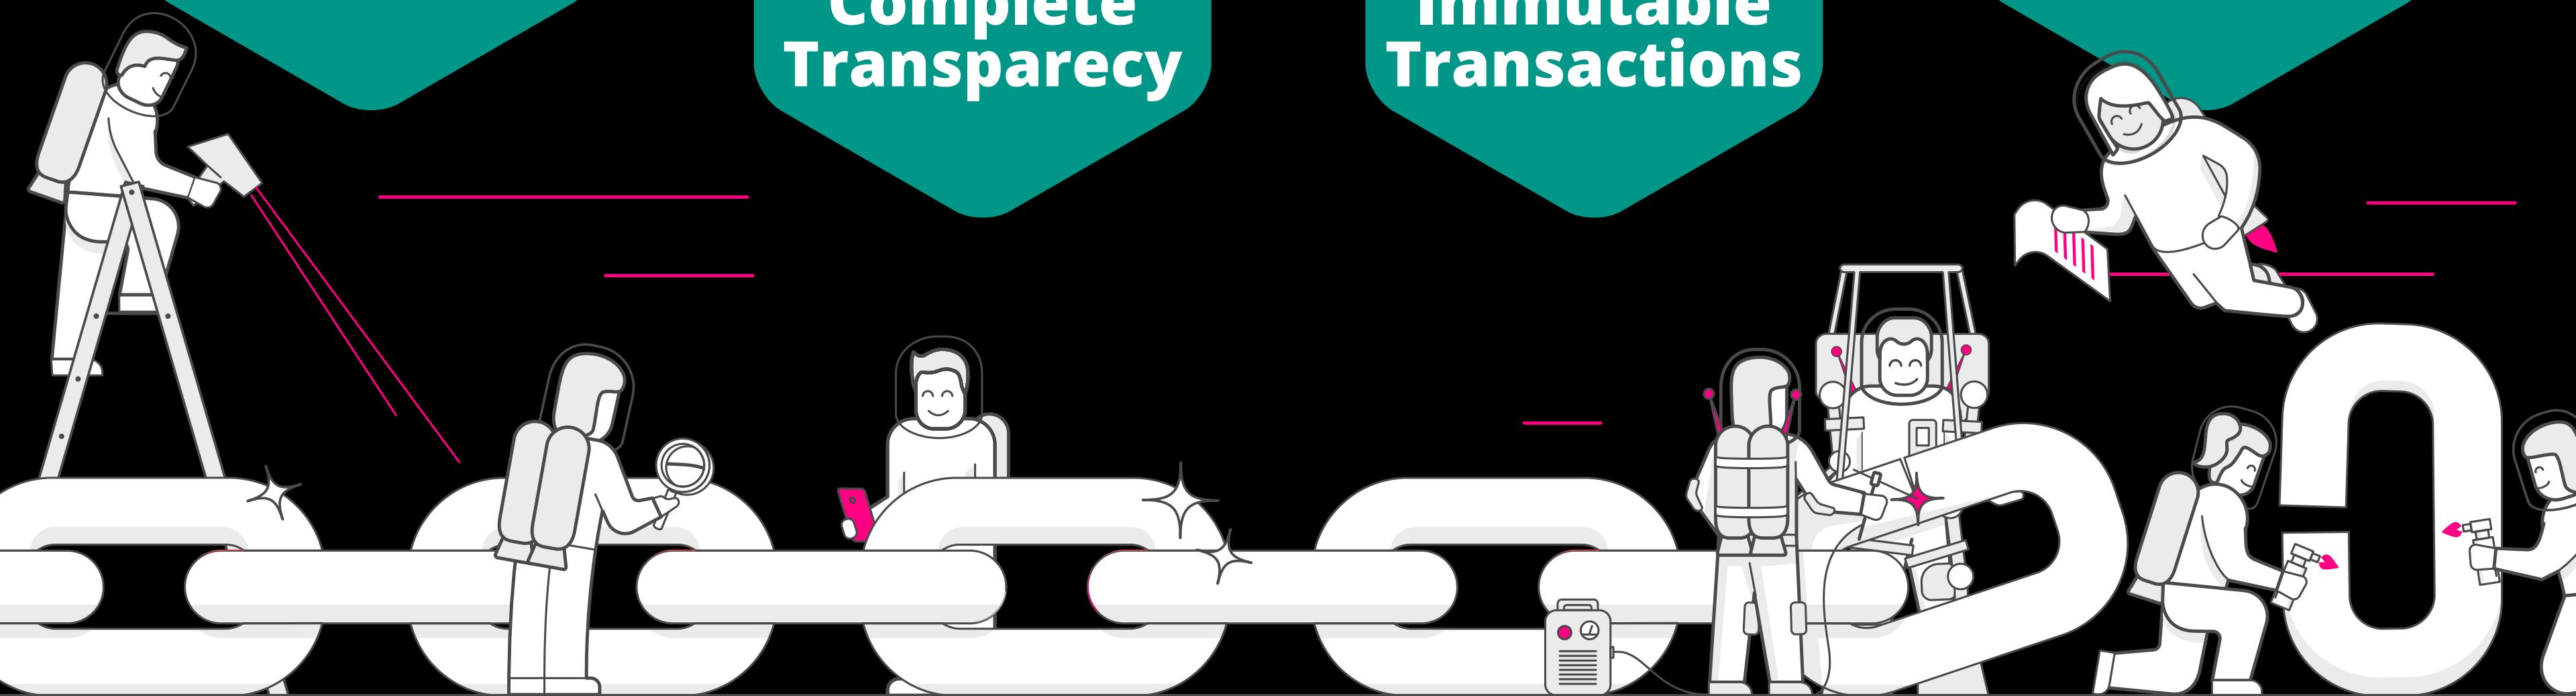

Complete  
Transparecy

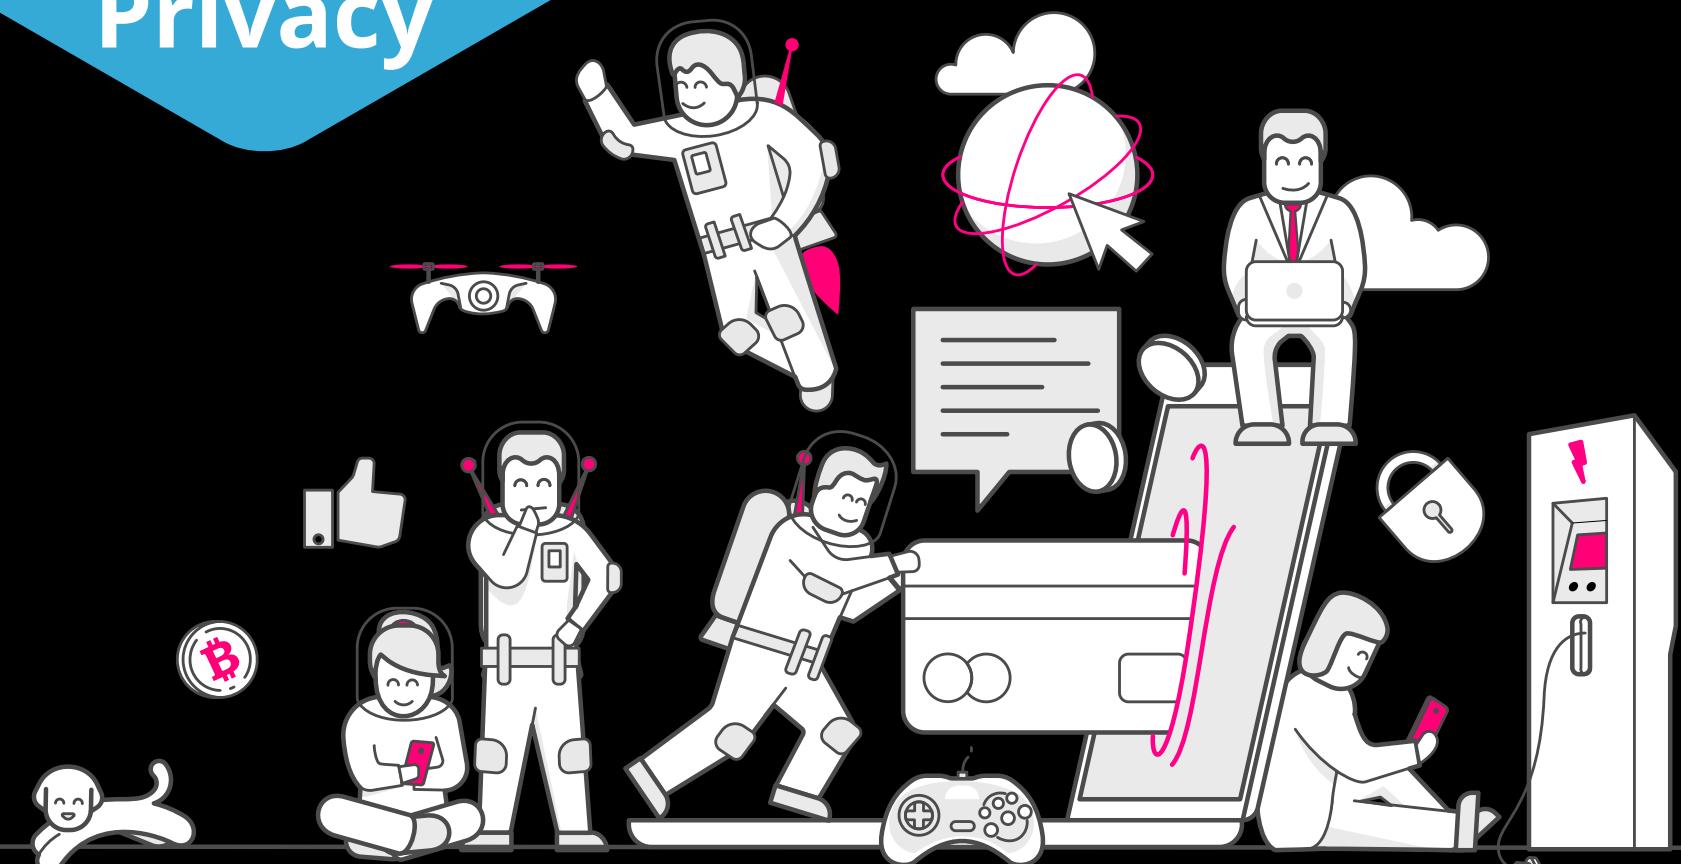

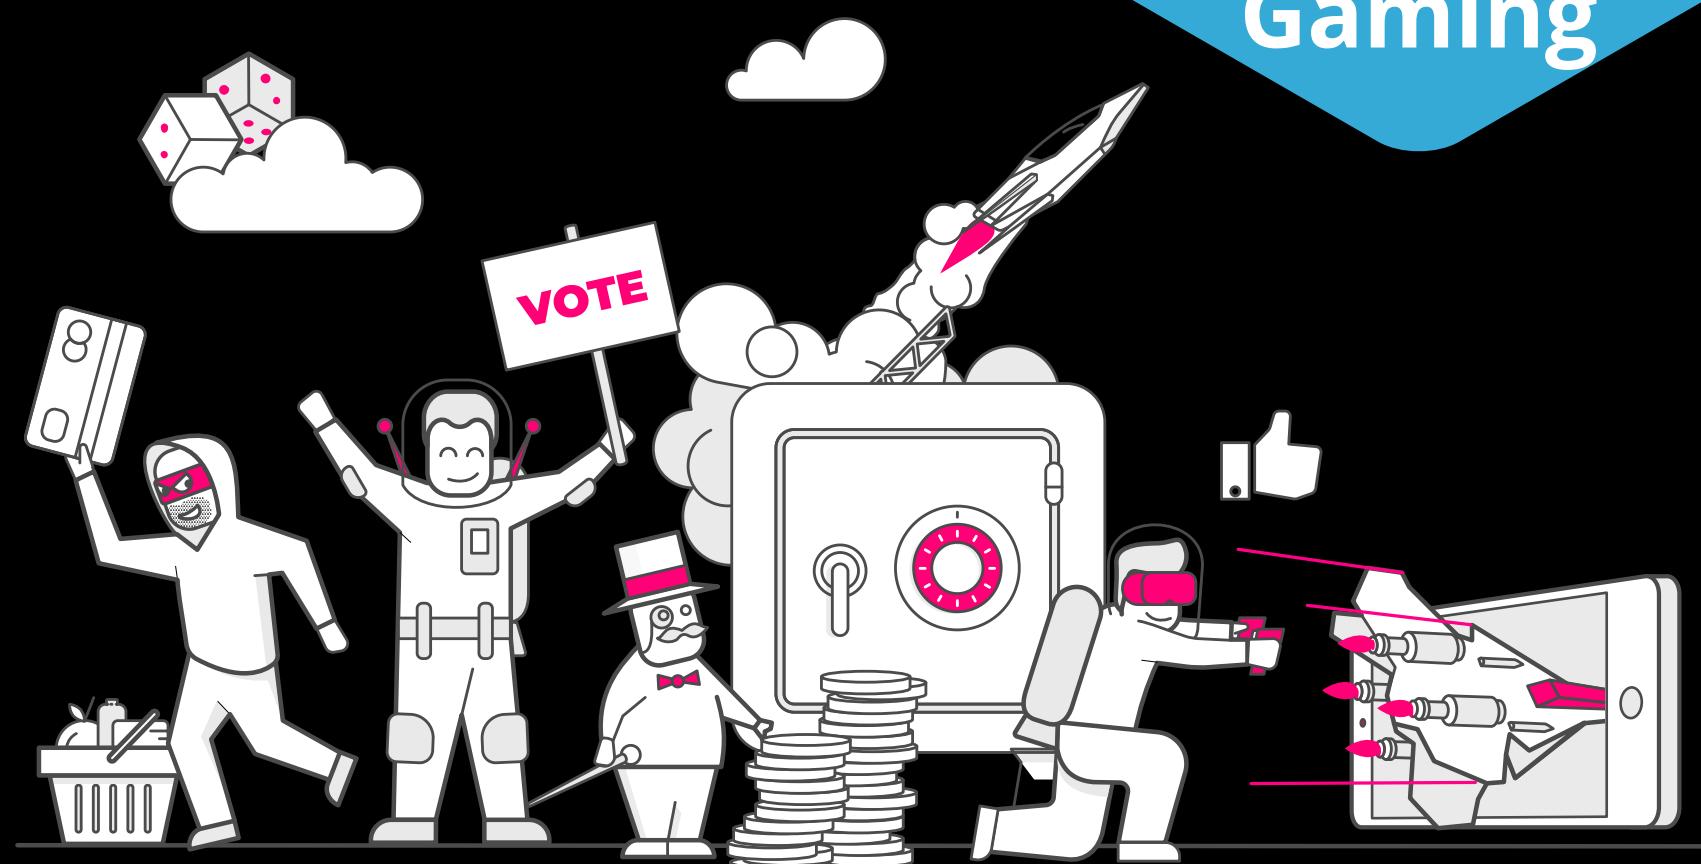

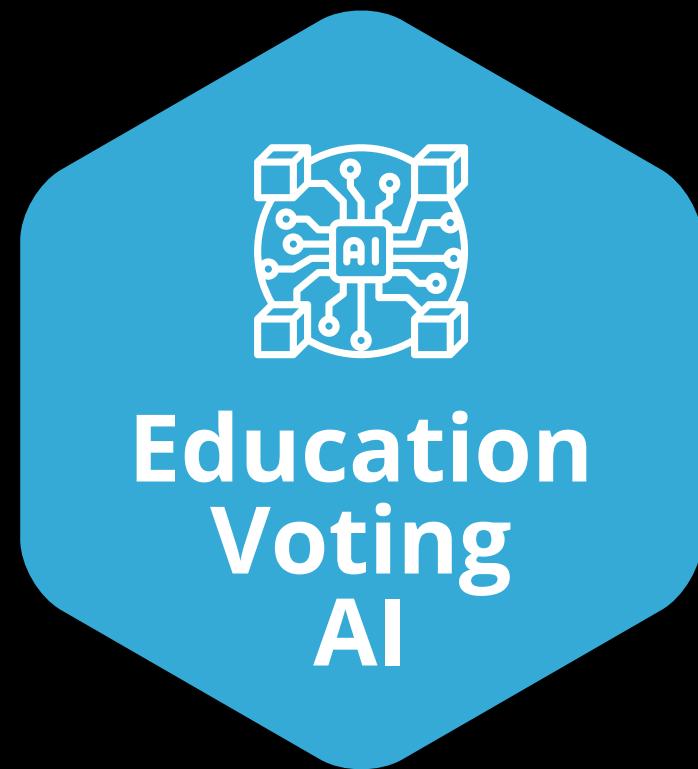

Immutable  
Transactions

No one can  
Hack

# Usecase of Blockchain !

# Cryptocurrency

# What is Cryptocurrency?

A cryptocurrency is an encrypted data string that denotes a unit of currency. It is monitored and organized by a peer-to-peer network called a blockchain, which also serves as a secure ledger of transactions, e.g., buying, selling, and transferring.

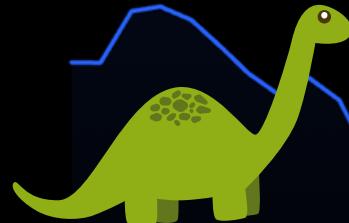

*There are more than 2500 Cryptocurrencies*

# Decentralised Finance (DeFi)

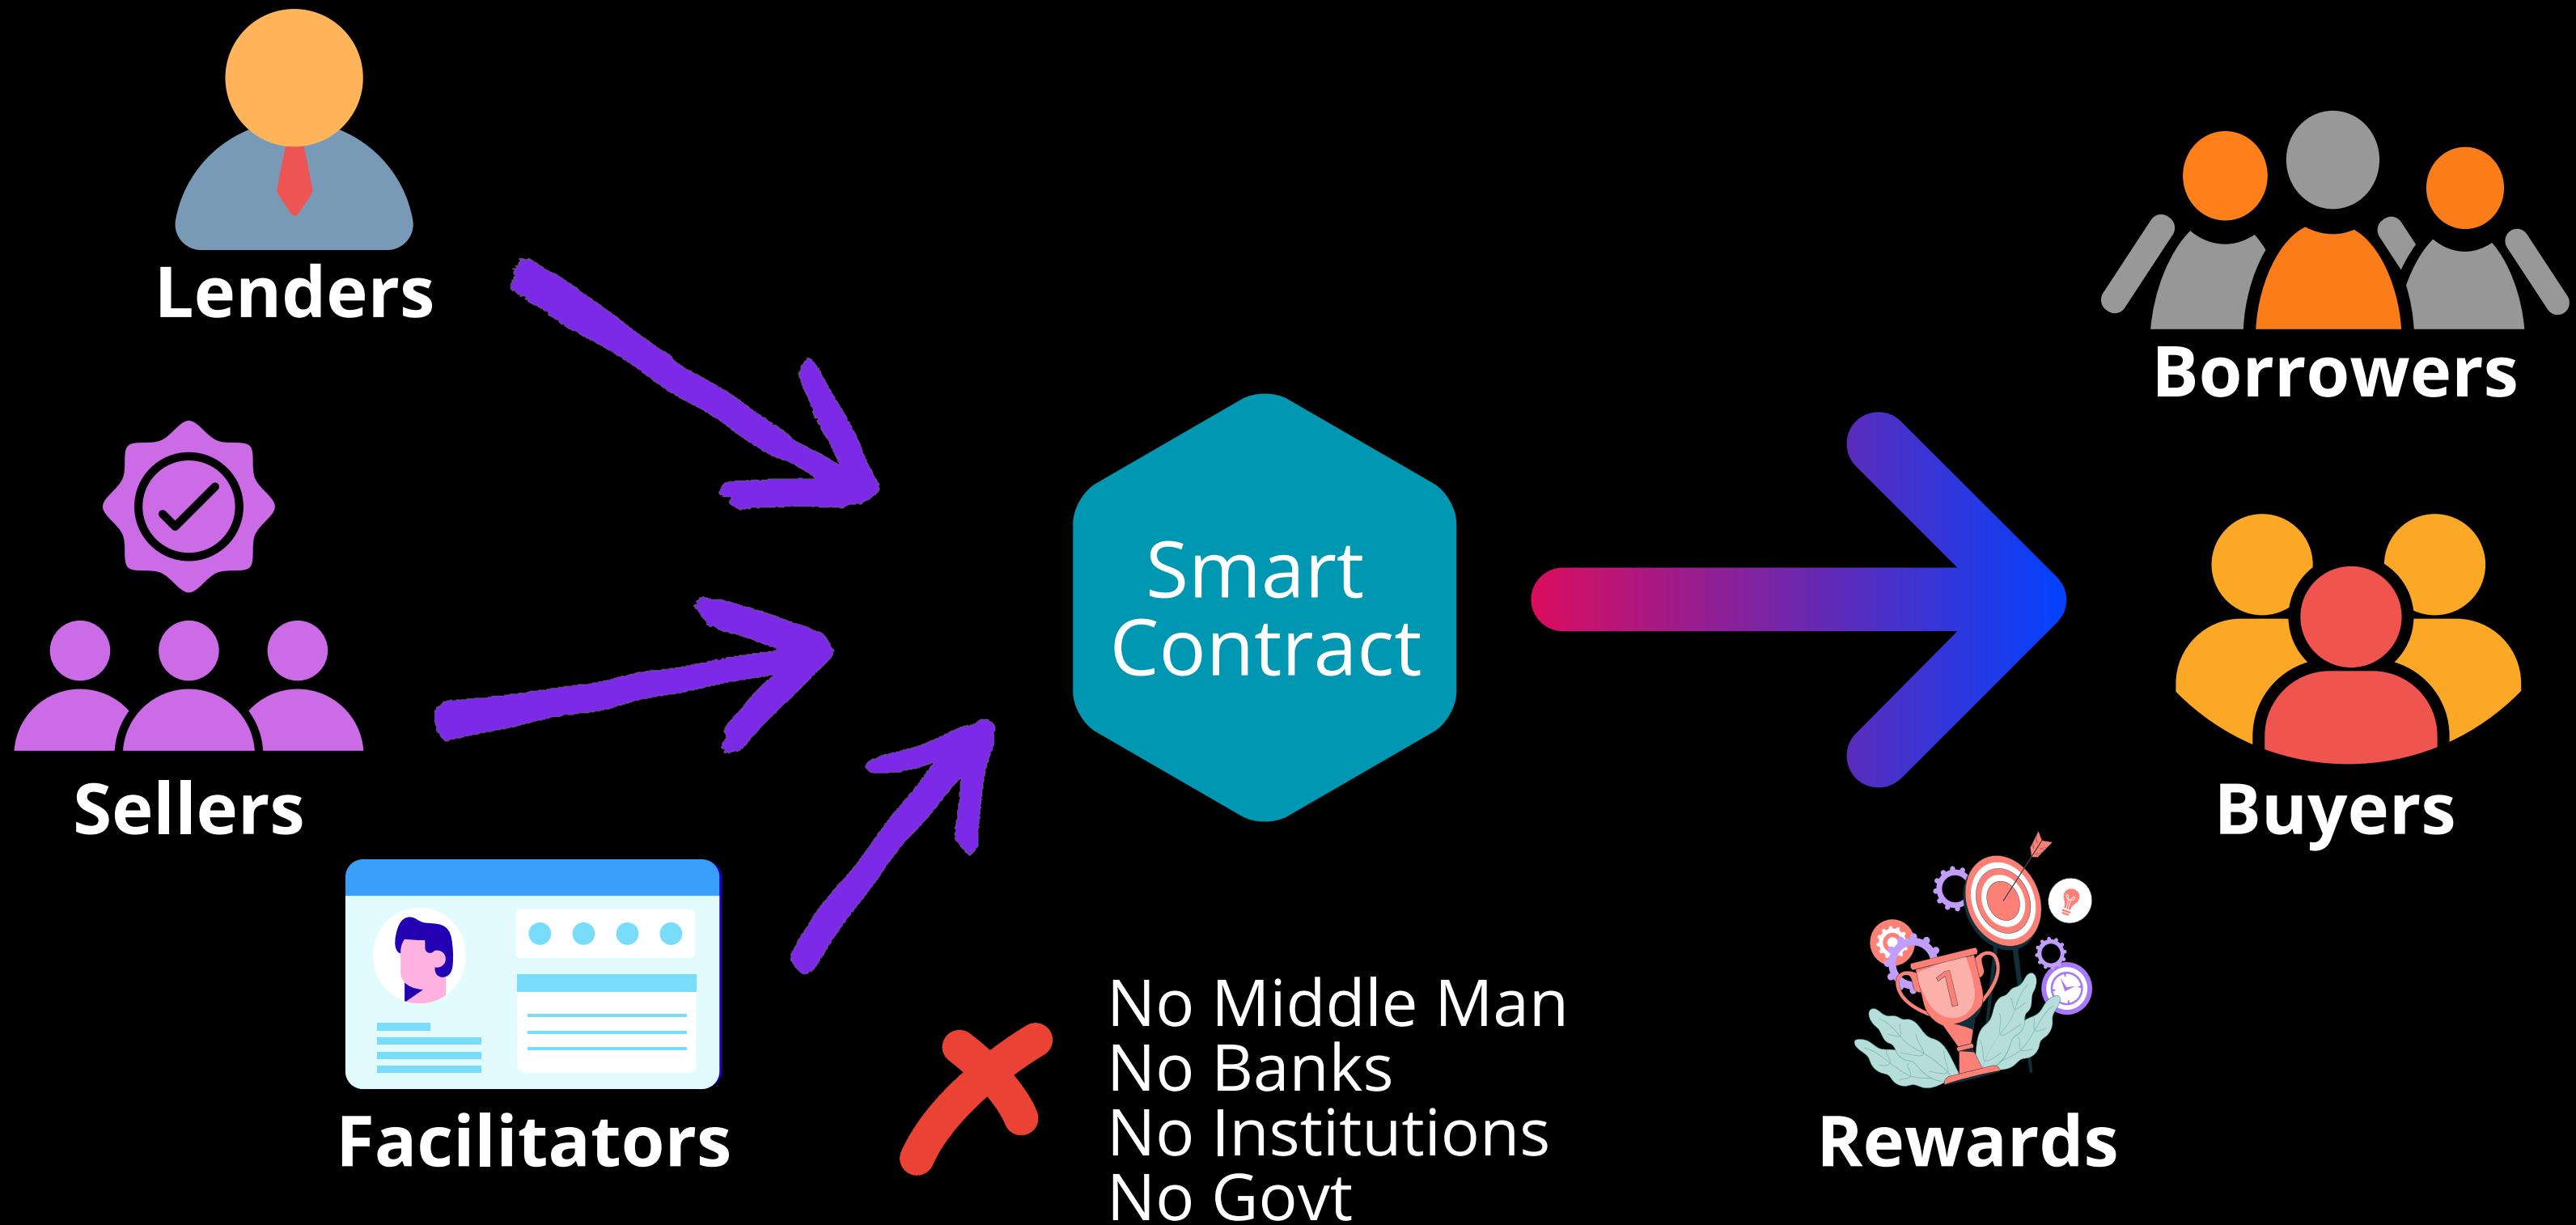

# What is Decentralised Finance?

Decentralised finance (DeFi) is an emerging financial technology based on secure distributed ledgers similar to those used by cryptocurrencies. The system removes the control banks and institutions have on money, financial products, and financial services.

*You don't need banks or any other institution to do transactions with DeFi.*

# Metaverse

# MetaVerse, The Future !

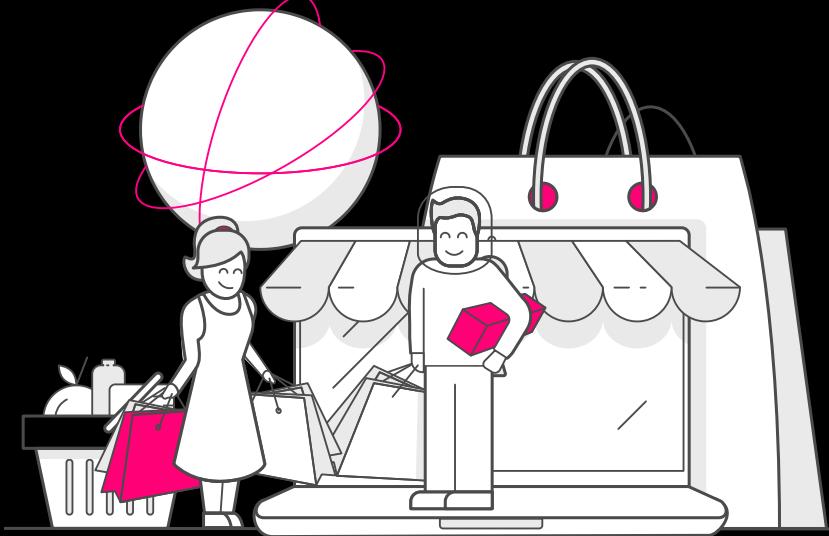

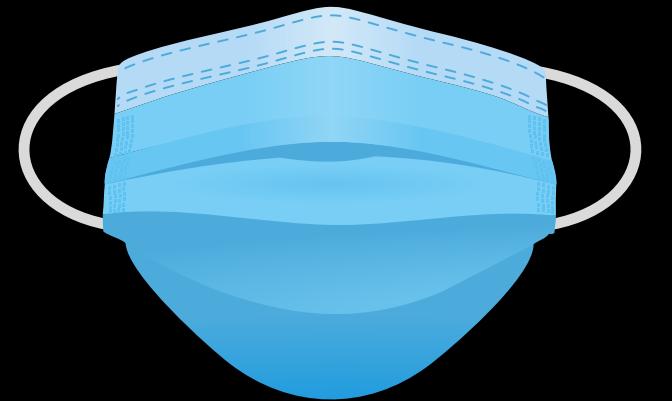

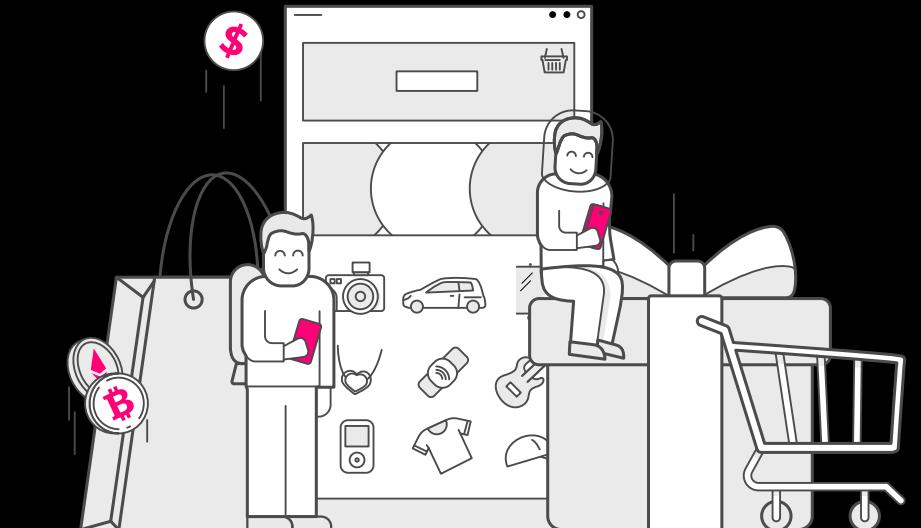

The **metaverse** is an extension of our real world into the digital realm providing an immersive multi-user experience for anyone accessing it around the globe. Accessing this virtual world requires the Internet and digital devices. The technology behind this is called Augmented Reality (AR) and Virtual Reality (VR).

# Importance of MetaVerse

As world went through the PANDEMIC of COVID-19, many industries and nations has faced the economic crisis, because we had not prepared for it. But surprisingly many industries flourished and boomed many folds, like **IT, virtual products, gaming, online shopping & crypto** is one of them.

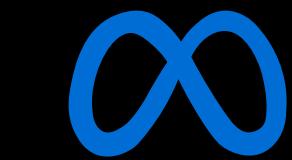

*World is moving towards virtualization  
and MetaVerse is the destination.*

# Web 3.0

# Web 3.0, The Future of Internet

Web 3.0 is the third generation of the evolution of web technologies. The web, also known as the World Wide Web, is the foundational layer for how the internet is used, providing website and application services. In web 3.0 there will be huge privacy & your data protection. All based on blockchain & completely decentralised.

***No one will be able to track a user on web 3.0. Data will be most secured.***

# The Evolution of Web

## Web 1.0

Static web pages,  
lack of interactivity.

## Web 2.0

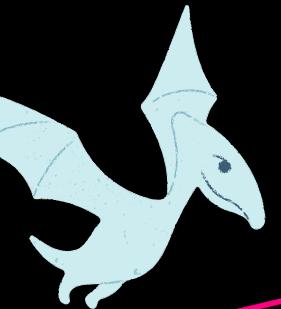

Social media  
platforms, user-  
interactivity, web  
application &  
databased.

## Web 3.0

Decentralized, usage  
of blockchain, data &  
user privacy centric.

# Global Rewards

A Random User from the Global List will get 10% of the Registration Value as Global Reward.

10%  
Global  
Reward  
Rate

# Weekly Rewards

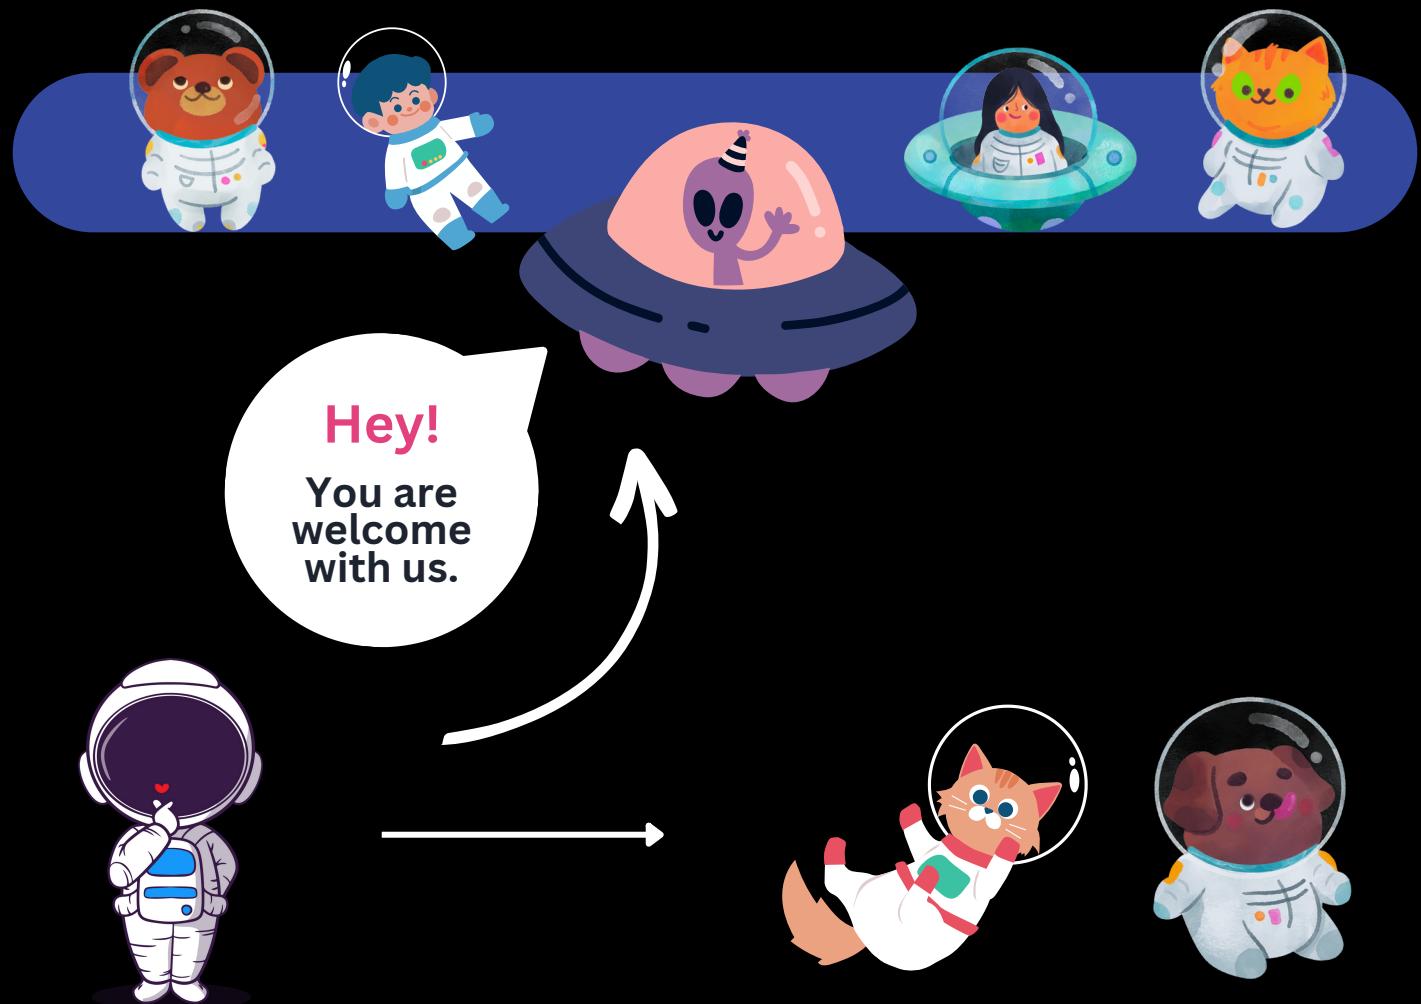

A Random User from the global list will be paid 10% of the total weekly Registrations Value as Weekly Reward.

10%  
Weekly  
Reward  
Rate

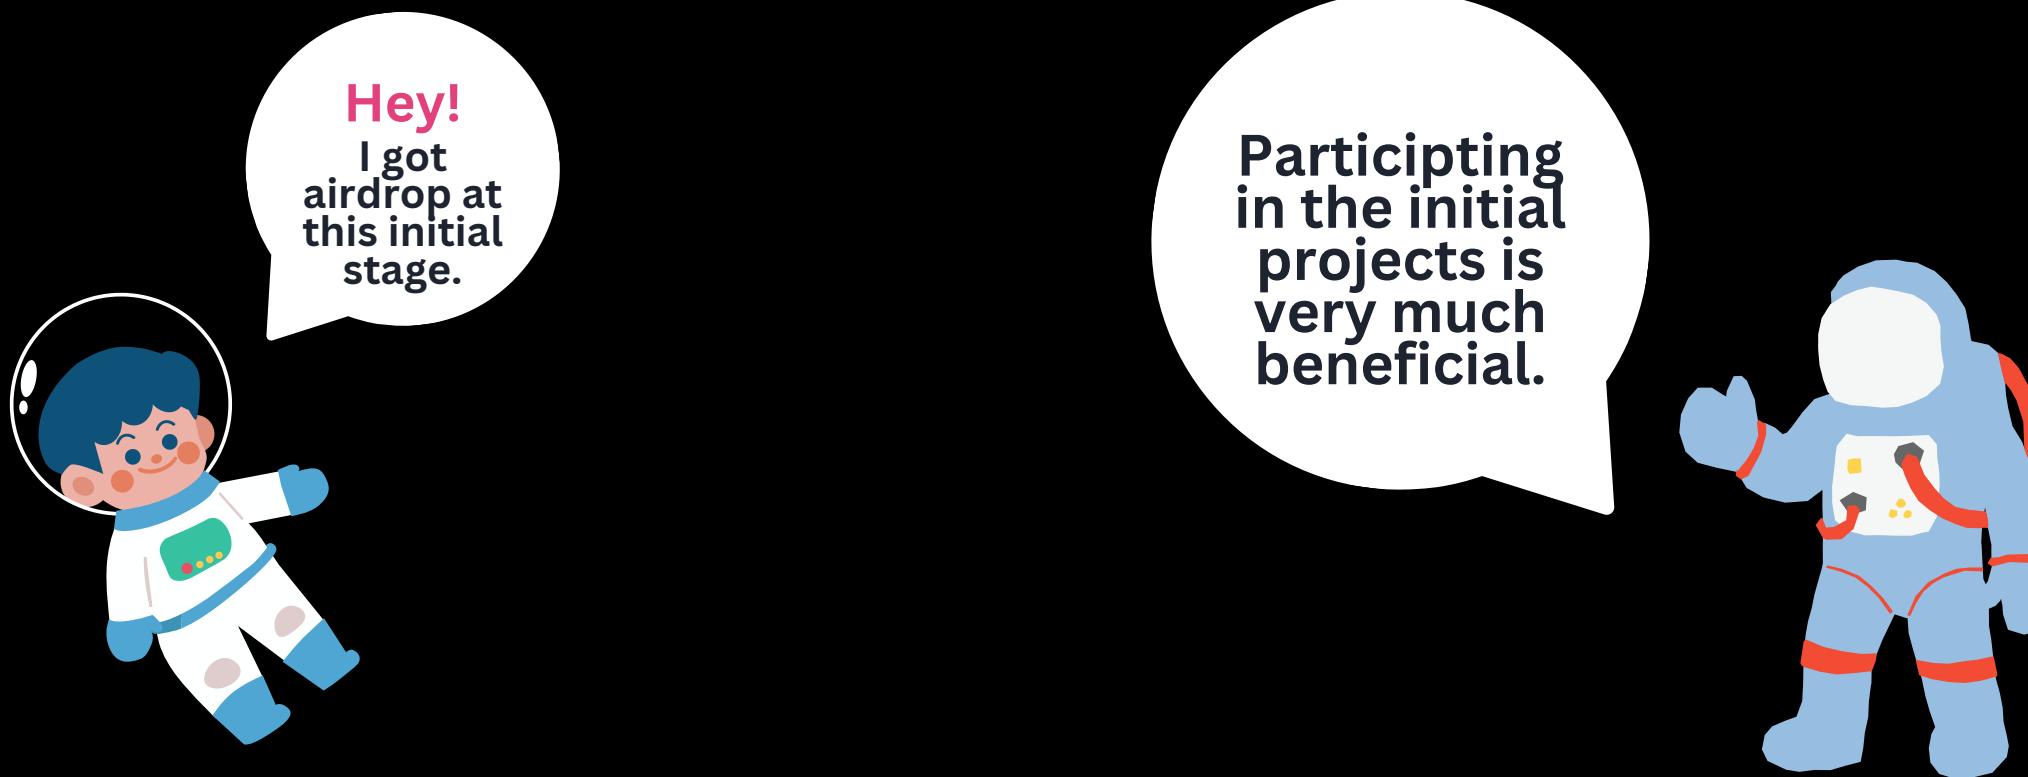

# What is Global List

Global list is from where all random users will be chosen for Global & Weekly Rewards. On every 2 referral your wallet address will be added in Global List automatically.

# Get Airdrop & APY

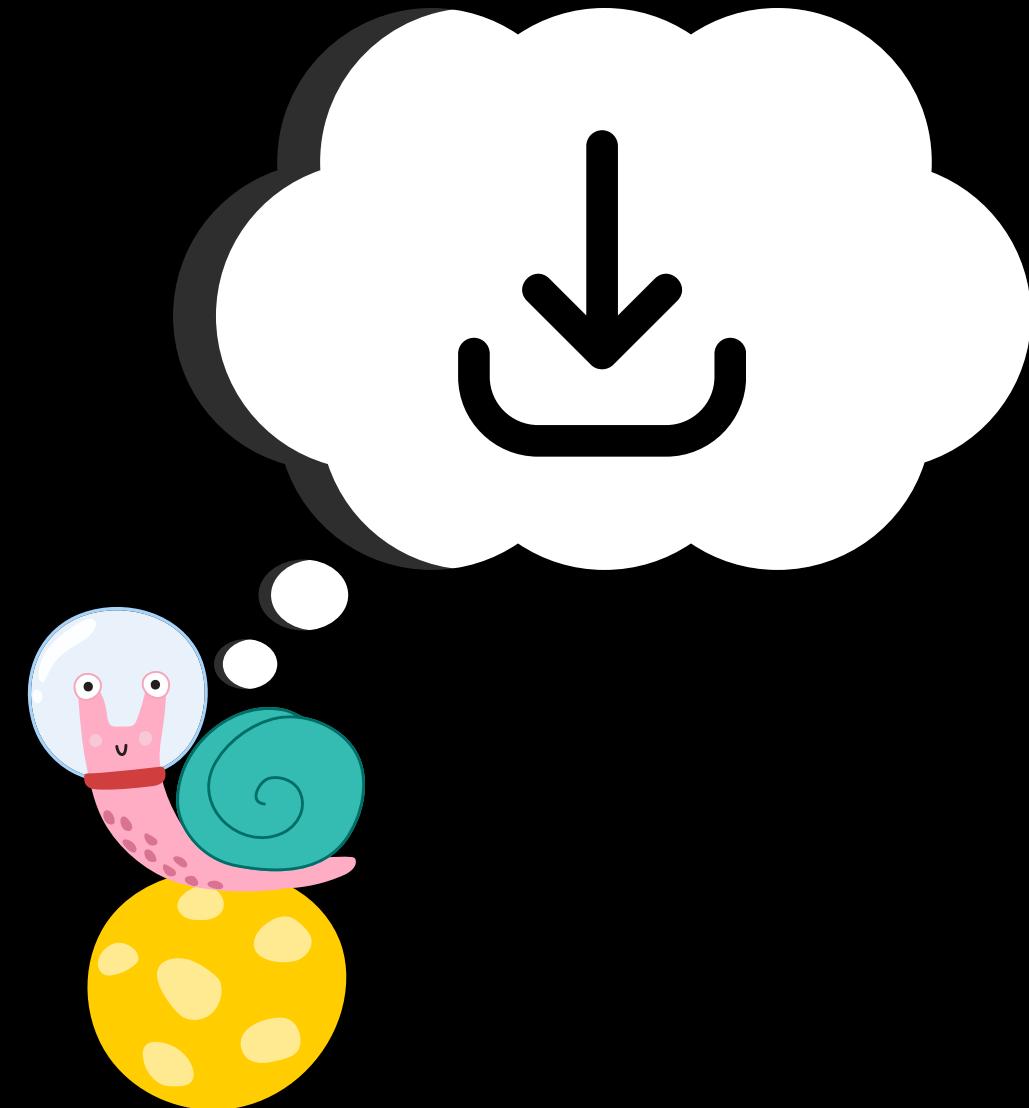

You get airdrop of MartianVerse tokens when you register on [www.marsnext.io](http://www.marsnext.io) & those tokens will staked for 18 months & you get APY of 66%.

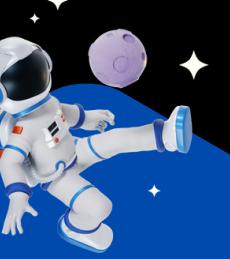

Listing on DeXs and Exchanges will be soon. You can claim your staking rewards anytime without any time limit.

# Liquidity Generation

Referral difference or any remaining value in the smart contract will be used for adding liquidity so that there must not be a liquidity crunch for the MartianVerse token.

## Supported Chain

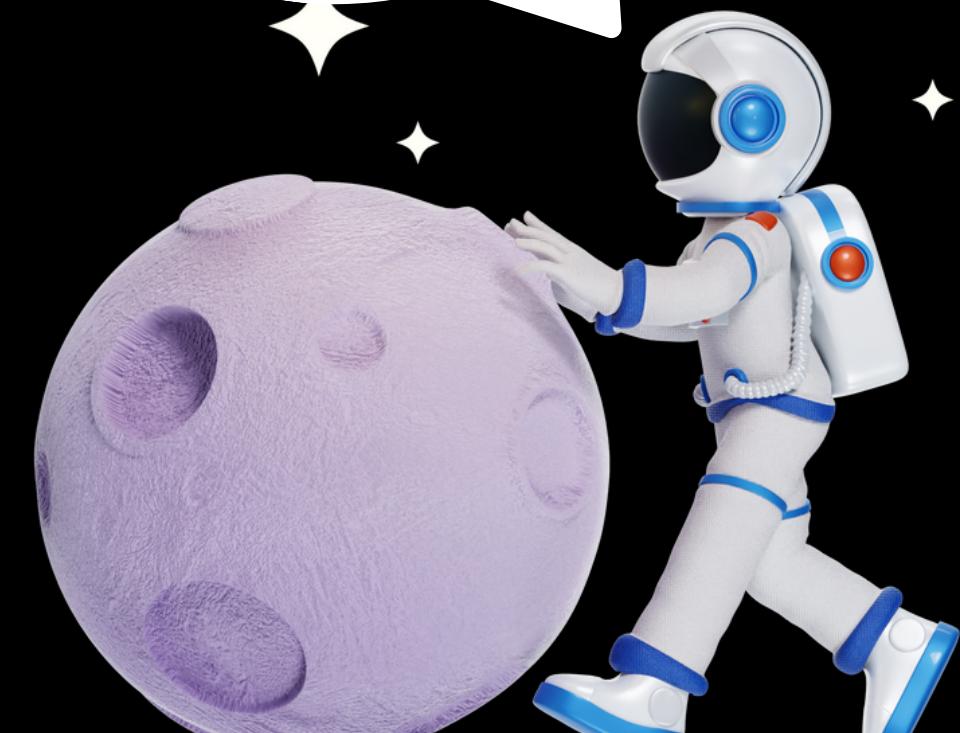

USDT is world's top stable coin network.

## Supported Currency

Polygon is one of the top and widely used blockchain

Support for more chains & currencies are coming soon

# Why to register

The MarsNext protocol is built on decentralized smart contracts, ensuring transparency, security, and open-source accessibility. Our website is also open source, reflecting our commitment to openness. Once we are confident in the proper functioning and bug-free nature of our systems, we will renounce ownership of all smart contracts.

MarsNext is primarily focused on community building, with up to 95% of the distribution allocated to community members through referral programs, global rewards, and weekly rewards. Additionally, participants receive airdrops of MartianVerse tokens and can earn APY on those tokens. When comparing these benefits and rewards to other programs, there is no comparison. Our unique program is designed with a long-term and comprehensive vision.

**Building a future on Mars, where transparency, user privacy, community centricity & absolute decentralization is our goal.**
